

Thank you for your enquiry regarding our Western Red Cedar Custom Tubs.

Sunlander Outdoor Products have been manufacturing a range of quality Western Red Cedar products for over 40 years in Adelaide, South Australia. Our Western Red Cedar Tubs have been manufactured and assembled here at our workshop in Windsor Gardens for the past 25 years so you can be guaranteed a quality product.

Our Western Red Cedar is the ultimate green building material. The timber is produced from sustainable publicly managed forests in British Columbia, Canada.

The province has exceeded United Nations guidelines by setting aside more than 12% of its land base as parkland. Less than 1/3 of 1% of BCs' Cedar growing stock volume is harvested each year. For each tree harvested, three are replanted. The fact is there are more forests in North America today than there were 100 years ago. These young forests are excellent carbon sinks. They also release oxygen back into the atmosphere contributing to a healthier environment.

Relax in style and feel invigorated by enjoying a beautiful Western Red Cedar Tub. Australian wooden tubs blend perfectly with the natural surrounds or can fit nicely into a wooden deck. The touch and aroma of a wet Western Red Cedar Tub make them an absolute pleasure to use. A big advantage of a deep tub is that you can completely immerse yourself in the water & have the feeling of buoyancy.

Whilst soaking in a tub, the heat, massage therapy and buoyancy combine creating the perfect environment for treating any number of ailments, such as arthritis and sports injuries.
